

**IAMTS welcomes you in Vienna
on June 23 at Praterstern**

Thomas Quernheim, IAMTS Chairman
Will provide an overview about international regulatory developments for automated driving

Dr. Andrea Leitner, IAMTS Chair of Technical Leadership Committee
Will talk about the technical implementation of regulatory frameworks for automated driving as well as implications of digitalization

IAMTS member companies will explain how they apply cyberphysical testbeds for automated driving, validate simulation tool chains and standardize data exchange

International Alliance For Mobility Testing And Standardization

IAMTS Symposium 2025

Digitalize safety assessment of automated driving

Where: Austrian Standards, Heinestrasse 38, 1020 Vienna
When: June 23, 2025 from 8:45-14:00

AI (Artificial Intelligence) and SDV (Software Defined Vehicle) are transforming the automotive sector at a fast pace – the priority to get regulatory approval for ADS (Automated Driving Systems) is increasing in the industry.

IAMTS provides answers how to apply international regulatory frameworks and key building blocks to digitalize and optimize vehicle type approval/safety assessment processes for ADAS/AV through standardization and best practice.
