

June 14-15, 2022

Where global experts meet to move forward standardization and certification of cyberphysical CAV testing and test infrastructure to prepare for the future of mobility

What to expect ?

The IAMTS Symposium will be first time organized as a true hybrid event for IAMTS members and invited guests to learn in an immersive CAV testbed environment with our host at ZalaZONE in dialogue with key stakeholders of the ecosystem – including Automotive OEM's and Tech Companies – what needs to be addressed from a test methods and test infrastructure perspective to bring highly and fully automated vehicles to market - both in the virtual and the physical world. ZalaZONE is one of the most modern cyberphysical CAV testbeds in Europe and we want to discuss how we can apply new standardization and certification approaches in such an environment.

Event structure

- **Engaging keynotes and panels** from IAMTS members and invited guests to give their perspective on standardized CAV testing.
- **Introduction to the structure and capabilities of ZalaZONE** by the CAV testbed initiators and operators as well as future plans for development.
- **Cyberphysical vehicle and lab demonstrations** to showcase how the testbed capabilities can be utilized by clients and partners.
- **In-depth sessions** with short presentations and moderated discussions that cover the different working group activities of IAMTS and put them in context with the ZalaZONE CAV testbed.

Examples of companies and organizations to interact with during the symposium:

How to engage ?

- Send your interest to participate to joachim.taiber@iamts.org and get your invitation
- Please visit iamts.org and check out the event section for detailed program information
- Register as participant through the website with a registration code which will be sent to you with the invitation

“On behalf of the IAMTS Board I would like to welcome you to be part of this exciting event which will bring the global community of IAMTS and their supporters together”

Alexander Kraus, Chairman and representative of TUEV Sued at IAMTS
